TRA: **R-1**
Speed Rating: **A6**

Alliance 349 Yield Master is a premium bias tire offering with a stubble-resistant tread compound making it an ideal choice for on and off-road harvester applications. Its tread design with a 23 lug angle enables higher traction, good self-cleaning and low soil compaction. Its larger footprint results in a larger contact area while enabling excellent grip. The larger amount of rubber in contact with the ground results in slow tire wear and provides excellent roadability.
