

ALLIANCE
AGRICULTURE

TRA: I-1
Speed Rating: A8

Alliance 542 is engineered for the free-rolling wheels used in harvesting machines, hay balers, bale racks, seeders, windrowers, and fertilizer spreaders. Its heavily grooved ribs yield excellent performance, enhance overall stability and help in easy steering of the machinery. The high rubber volume and void ratio leads to lesser tire wear, increased tread life, bigger footprint and minimal soil compaction.
