

MATERIAL HANDLING

TRA: **IND-4**
 Speed Rating: **A2**

The HARBOURMASTER provides high-ground contact for improved traction on paved surfaces. A flat tread with a large width provides more ground contact for excellent traction. A specially formulated extra deep tread improves the HARBOURMASTER's penetration and heat resistance, while a reinforced sidewall improves its service life. This tire has been specially designed for empty container handlers and reach stackers in intermodal/logistics applications.
