INDUSTRIAL**

TRA: **F-3**
Speed Rating: **A8**

Galaxy Super Industrial Rib tires are designed for the front wheels of a two-wheel drive backhoe. Galaxy has developed this unique design to ensure even less soil disturbance and cutting on grass by introducing an F-3 version. The combination of flotation and low compaction makes F-3 the perfect tire for golf courses and cemeteries. The Galaxy Super Industrial Rib tires are used in Pick n Carry Cranes as well. The tough nylon casing provides long tire life and stability. The special Zig-Zag rib tread design is suitable for pick n carry cranes in all industrial and construction usage. It also has a special compound that enhances long tire life and ensures superior performance under heavy load & dynamic flexing. Reinforced Bead provides high load carrying capacity and reduces chances of bead failure.
