TRA: **R-1W**
 Speed Rating: **A8**

The Galaxy Earth-Pro 900 Radial R-1W Agricultural Radial offers a complete range of front and rear tractor tire combinations. The pads between the lugs, apart from adding strength to the tire, act as mud breakers to enhance their self-cleaning characteristics. The reinforced lug, bead areas and the improved tread compound, used in the tire, provide longer life of the tires. A smooth ride both on & off road is enabled by the multi-angle lug design with steep angle in the center. The shallow angle at shoulder and higher NSD provides superior traction.
